

GALAXY E10

Acousto Magnetic 58KHz System

Wide-Range Antennas Cost Effective Stand Alone Antenna

- Elegant and slim design, attractive clear with ABS frames design.
- All electronics with compact are integrated into pedestals.
- Each antenna is stand-alone unit that can be used alone or together with antennas.
- Wide detection range, one antenna can cover wide entrance or exit with at least antenna(s) and budget.
- Strong noise immunity in complicated installation environment.
- Easy and intelligent tuning with lap-top computer.
- Suitable both for shops with limited entrance space and for shop with large entrances.
- Leading DSP technology provides precise detection for AM tag/label, avoids false alarm effectively. Wireless synchronized with antennas nearby via WiFi connection.

Highly Integrated Structure

Precise Detection, No False Alarm

The Best Cost Performance

Work Efficiency, Improve Troubleshooting

Reduce Criminal Rate

Without Interference Operation Flow

No Hardware Dismantling Require For All Troubleshooting Work

Ultra Detection Performance

WiFi Adjustment via Cellphone/Computer

**Efficiency
in Your
Pocket!**

GALAXY E10

Acousto Magnetic 58KHz System

Wide-Range Antennas Cost Effective
Stand Alone Antenna

Detection Range

- Pencil Tag : $\geq 1.8\text{m}$ (one side)
- AM Label : $\geq 1.5\text{m}$ (one side)
- Can work with 2 slave antennas, single aisle width $\geq 3.6\text{m}$ for pencil tag
- Remark : detection distance is influenced by the store environment and tag performance.

Antenna Specification

- Height : 1540mm
- Depth : 115mm
- Width : 390mm
- Weight : 5.6kgs
