

HIDDEN SYSTEM

Acousto Magnetic 58KHz System

UNDER FLOOR WIDE-RANGE ANTENNAS

The system's thin detection antenna is designed for installation below the surface of the floor.

The antenna can be installed in most floor types including concrete, wood, and others and is outdoor rated. The **Hidden Floor System** is an especially popular anti-shoplifting system for mall stores where aesthetics and performance are primary requirements.

Features & Benefits

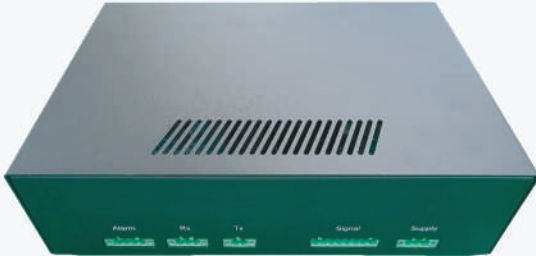

A single detector antenna can cover exits up to 2.1m (7') wide. The system is suitable for both ground-level and elevated installations. A remote alarm unit provides both visual and audible alarms.

A plate mounted near the system contains LEDs that allow customers to review the status of the system and provides an RS232 connection for service personal to communicate with the system safely.

Acousto Magnetic 58KHz System

UNDER FLOOR WIDE-RANGE ANTENNAS

Specification:

- Power input : 220VAC/110VAC@50/60Hz
- Dimension of Anthena : 1580*600*20
- Dimension of Controller : 340*250*100
- Dissipation : 25W
- Frequency : 58kHz
- Effective Hight : DR Label > 1100mm
25 Tag > 1300mm
39 Tag > 1600mm
50 Tag > 1800mm
- Configuration : On Field and Remote Control
- Tickness : 20mm
